KANSEIKEI

Hello, every one. Have you checked "WHAT'S NEW" in our HP?

The network which supports local **1*SME** to create **2*"GREEN BUSINESS"** will be started in each prefectures in autumn. President Kondo is one of the promoters of it. It was inaugurated because lots of major companies had to cut a budget by financial crisis in last autumn and it makes management of local SME very hard. Specifically, they will start from having discussion or diagnostics of management. At the annual meeting, inviting local banks and investment funds they will hold business contest and promote to get in operation. The first annual meeting will be held in Kyoto in next March. This is considered to cooperate with Asian companies or set up fund by investments from members in the future.

1*SME = Small and medium sized enterprise

2*GREEN BUSINESS = for example, Waste Management or Related products and services

Bits of knowledge

A fire work festival was held near our company this day!!

As you know, many parts do not like to be wetted by water.

However we have rainy season in Japan and just now it is.

Even if we load containers in this season or rainy days, please do not worry about it. We protect goods by sheets or boxes of course.

We always hope you will get our goods in a good condition and can make you glad!!
