## ○ MESSAGE TO OUR VALUED CUSTOMERS

Kaiho Sangyo Co.,LTD.  
President  
KONDO NORIHIKO

We have a training institute called "IREC (International Recycle Education Center)", which will also accept many buyers from foreign countries. IREC is a training school for those who pursue a license for professional automobile recyclers. Sometimes I also teach at IREC and have welcome 16 students. We have provided this program the recyclers from not only domestic but international companies. In last February, we held the second International Recycle Conference by welcoming ambassadors from each country. We have been trying with innovation in this field. Many Japanese automobiles industry including TOYOTA has been developing and well evaluated all over the world. This development can be called an arterial industry, and our business can be venous one. Disused cars are usually treated as garbage, but they can become very precious and beneficial resources as well. They contain quite rare metals more than other natural resources. Therefore, the disused cars can be precious treasure!! It is important to circulate the valuable resources.

## ○ RISING IN THE PRICE OF MATERIAL ( IRON )

## ○ STATEMENT BY MS. MAI KATO (EXPORT DIVISION: NEW FACE)

Hello! My name is Mai who is a new staff in Kaiho Sangyo. There are lots of new things around me and I often get confused, but my coworker helps me a lot!! You will like them and Kaiho Sangyo ♪ If you are interested in our company, I would like to help you whenever you want. Please contact us and see me in Japan 😊
