MESSAGE TO OUR VALUED CUSTOMERS

Parent-Child Ecology Tour

On August 27th, we invited 40 parents and children to our company for Ecology Tour. Our factory was chosen by a local television company for their Eco-Heart Campaign. It was quite rare for us as well to invite general public to our factory. But, we were also excited to explain them about recycling vehicles with fun quizzes. They seemed to be surprised and excited to see what we are doing everyday to save our environment by recycling the vehicles. We also would like to thank everyone who made this invaluable plan.

We didn't know even there is a company like this recycling vehicles so far. We learned even the things we don't need any more can be reused somewhere in the world.

I was impressed when I saw airbags and vehicles were crushed. I knew the vehicles were recyclable, but I was excited to see them today by myself.

Hello, I'm Nishihashi, an overseas sales manager in our export division from this year. Lately we are having difficulties in exporting used engines and auto parts because of steep rise in material price and strong yen rate. It is a hard time for our buyers as well who need to purchase them. And, since there was a summit meeting in Toyako, Hokkaido in this July some buyers from foreign countries couldn't acquire their visa. But, now there are no problems for our buyers to acquire their visa to come to Japan safely. Although sometimes we have difficulties in many ways, I will do my best for the rest of this year with our new staff. Our new staff will appear in the News Letter for next month. Please don't miss it!!!
